

DESK RESEARCH REPORT

INTELLIGENCE IN STATIONARY AND INDUSTRIAL BATTERY APPLICATIONS

D4.1 Desk Research & Data Analysis ISIBA –Release 1

This report covers every stage of the whole battery value chain, which is analysed from the following perspectives:

AND THERE IS MORE

Have you ever wondered how batteries are used in stationary applications and what kind of skills and competences are needed?

This desk research also studied stationary battery use. It covers, for example, the increasing use of variable renewable energy sources to support grid and off-grid systems, telecom base stations and various heavy-duty applications.
