

BATTERY MANUFACTURING AND THE ANATOMY OF A GIGAFACTORY

D4.4 Desk Research and Data Analysis for sub-sector ISIBA – Release 2

What is the anatomy of a large-scale battery manufacturer, a Gigafactory, like? In which environment does it operate? This report examines its departments, teams, and functions. It provides further understanding about the job roles, skills and competencies needed by battery manufacturers. The education aspect, primarily the vocational and the professional technician sectors (EQF 4 and 5), is also studied in the context of battery production.
