

RECOMMENDATIONS FOR THE EUROPEAN BATTERY SECTOR

D3.6 – Sectoral Skills Intelligence and Strategy – Release 1

Recommendations and considerations are mapped against the battery value chain or areas of interest and propose actions to improve the re-/up-skilling of the workforce or point out to issues that need to be considered when it comes to the skills agenda of the sector. They follow the structure of the sectoral intelligence part of the report.

RAW MATERIALS EXTRACTION AND PROCESSING

Target groups: Prospecting and mining companies, refineries, and their white- and blue-collar workforce; branch organisations; and authorities involved in exploration permits and mining concessions.

Strengthening the awareness on the critical raw materials questions for Europe and connected emerging trends.

Development of new skills needs (and relevant training material) for mining and refining raw materials.

Organisation of expert workshops and other events related to the skills needs within the raw materials domain and including key players, such as EIT RawMaterials.
